INSTALLATION

① ② ③ ④

1. Lift the bumper from the gap located on the bottom of the case.
2. Gently separate the bumper from the case.
3. Slide the iPhone onto the battery case. Make sure to snugly connect the phone to the lightning connecter.
4. Snap the bumper onto the back case and make sure there are no gaps between the bumper and back casing.
5. To uninstall the case, simply reverse the steps of 1-4.

HOW TO CHARGE

How to charge the Atomic Battery Case

75–100%
50–75%
25–50%
1–25%
1. Connect the case to any USB charging port via the provided USB cable, and the case will start charging. The LED indicator will flash when charging, and it will become steady when fully charged.
2. If you are going to charge the case and iPhone together, make sure to install the case on the iPhone before connecting them to a power source. The external power source will fully charge the iPhone first, then recharge the case.

How to charge the iPhone 6

1. Place the iPhone into the **Atomic c**ase.
2. Press and hold the power switch button for 2 seconds, t**he case will be begin to charge.**
3. When charging starts, the iPhone will vibrate or give a beep sound.
4. The battery icon on the upper right corner of the screen will feature a lightning bolt to indicate that charging is in progress.

CHARGING & CONTROLS

Press the button once, the LEDs will light up to show the remaining power in the case as following.

75-100%   50-75%   25-50%   1-25%

Power is switched off by default. Right after installation of the case press and hold the button for 2 seconds to manually turn the charger ON or OFF.

75-100% 50-75% 25-50% 1-25%   **ON <--> OFF**

Synchronization

The battery case supports sync-through technology. This means that you can sync your iPhone to a computer without having to take the battery case off. Simply plug the microUSB cable into the phone and the other end into the computer's USB slot. Synchronization will begin immediately.
